There is much confusion regarding the future of the Performance Pathway and this brief document seeks to provide clarification. More information can be found at <https://www.EnglandNetball.co.uk/the-roses-development-framework/player-pathway/>

Principles of the pathway change are:

To achieve England Netball's vision of having the world's most successful Performance Pathway. To produce World Class players, who strive for excellence and live & breathe a 'Netball First' culture. A greater alignment between the pathway and talent development.
